ABSTRACT

Descriptive statistics are presented on those students in Florida's State University System (SUS) who were previously enrolled in one of the state's 28 public community colleges. A series of tables present fall term data for 1981 through 1983, including information on: students' sex, age, and race; SUS enrollment rate of community college students; credits transferred; distribution of students by the university at which they were registered and the community college from which they transferred; grade point average (GPA); and students' majors. Highlighted findings included the following: (1) in fall 1983, there were 43,748 students enrolled in the SUS who had previously attended a community college, representing 42.2% of all enrollments in the SUS; (2) the percentages of male and female students were almost equal in 1981, but females outnumbered males in 1982 and 1983; (3) the percentages of both Black transfer students and White transfer students declined between 1981 and 1983, while there were significant increases in the percentages of Hispanics and nonresident aliens who transferred; (4) 37% of the transfer students were in their first year of study in the SUS in 1983, a decrease of 3% since 1981; (5) 79% of the students in 1983 transferred 60 semester hours or more to the SUS; (6) the largest percent of community college transfers tended to enroll in the nearest university; and (7) in 1983, 84.3% of the transfer students earned a GPA of 2.0 or higher in the SUS. INTRODUCTION

This report presents descriptive statistics on those students in Florida's State University System (SUS) who, prior to enrolling in their respective universities, were enrolled in one of Florida's 28 public community colleges. In the Fall of 1983, there were 43,748 such students which represent 42.2% of all undergraduates in the SUS. In 1982, there were 42,302 transfer students and in 1981, there were 39,470.

The Articulation Agreement, Rule 6A-10.24, Florida Administrative Code, facilitates the transfer of students from the colleges to the universities. That agreement also encourages the divisions to cooperatively conduct research. It is in this spirit that articulation reports have been produced by the Division of Community Colleges since 1973. In 1974, the SUS established the Student Data Course File which contains records of all students enrolled in the universities. Since then, a stable format of that file has allowed comparisons of students over time.

The reader will be interested in comparing groups of students of concern to him or her. Comparisons are not made herein, but sufficient information is provided for the reader to compare groups. Only brief comments will be made on the data and emphasis will be on the totals.

Tables 1, 2, and 3 present by sex, race, and age respectively, the frequencies of undergraduate students in the SUS where college of last attendance was a Florida community college. The percents of male and female students were almost equal in 1981, but females outnumbered males in 1982 and 1983. The percents of both black and white transfers have declined over this period, but this has been coupled with significant increases in the percents of Hispanics and nonresident aliens.

Table 4 shows that 37.0% of the transfer students were in their first year of study in the SUS in 1982, a decrease of 3.0% since 1981. This percent decreases as the number of years in attendance increases. In 1983, 80.4% of the students were in their first, second, or third year in the SUS. In 1982, that percent was 81.3 and in 1981, it was 83.3.

Table 5 clearly shows that the majority (79.0%) of students in 1983 transferred 60 semester hours or more upon entering the SUS. This rate is very nearly the same as in 1982, but is slightly more than in 1981. These rates probably indicate that students are utilizing the community colleges extensively to complete lower division work before moving on. Table 6 shows the total number of semester hours accumulated, including hours transferred, toward a degree.

Tables 7 and 8 show the distribution of students by the university at which they were registered and the community college from which they transferred. Percents in Table 7 are for columns (universities) and in Table 8 are for rows (community colleges). No particular trends are noted over the three-year period except that in Table 7 one sees that the largest percent of a community college's transfers tend to enroll in the nearest university.

Table 9 shows that most transfer students (84.3 % in 1983) earned a grade-point average (GPA) of 2.00 or higher while enrolled in the SUS. GPA is based on a 4.0 system and is calculated by dividing grade points earned by semester hours attempted. Since many GPA's equal to zero represent erroneous or missing data, these were grouped separately.

Table 10 compares two groups of 1983 SUS students, those who transferred prior to earning 60 semester hours at the community college and those who transferred after earning 60 semester hours. Data for 1981 and 1982 are not shown, but are available in prior editions of Articulation. Sufficient information is given for the reader to make comparisons between any two groups of interest. In 1980, and for several years prior to that, students who transferred after earning 60 semester hours achieved a GPA noticeably higher than the other group and with less dispersion. In 1981, 1982, and 1983, these differences are slight.

Tables 12 and 13 present the same data as Tables 10 and 11 except that each N (enrollment) represents the total from a particular college.

Table 14 shows the number of students in each major field of study by university. Each of these groups is divided into two subgroups, those whose GPA was higher than 2.00 and those whose GPA was lower than 2.00. Mean GPA for each group is reported in the final column.

Table 15 provides the same data as Table 14, but for the SUS over the three-year period.

*The State University System (SUS) Data Course File, which is the source for this table, was changed in 1983 to reflect Classification for Instructional Program (CIP) numbers instead of the previously used HEGIS numbers. Therefore, a table comparing current and previous years was impossible to construct. Some categories are new and others have been split into two groups. If comparisons between years must be made, please use the current year data on the previous page and compare the programs by name if applicable.

FLORIDA: A STATE OF EDUCATIONAL DISTINCTION. "On a statewide average, educational achievement in the State of Florida will equal that of the upper quartile of states within five years, as indicated by commonly accepted criteria of attainment."

Adopted, State Board of Education, Jan. 28, 1981
